The restriction requirement states that the inventions of Groups I and II are related as process and apparatus for its practice and are distinct from each other if it can be shown that either (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process.

In response to the requirement for restriction, Group I is elected and claims 16 through 22 are submitted to be examinable with the elected Group.
